

WE WON

~~FIGHT FOR~~
LEGISLATION TO
PROTECT OUR
JOBS!

For decades, when Verizon or other telecom equipment must be moved – make ready pole work – it's been done by CWA workers, ensuring the safety and quality of the work.

Proposed “One Touch Make Ready” regulation would have allowed other companies (and their contractors) to move existing Verizon equipment, putting our jobs and our communities at risk. **But we fought for - and won - legislation in New York to block this regulation and protect our jobs!**

CWA members throughout New York sent over **2,200** emails to NYS legislators and held dozens of meetings to tell them that they *must* protect our jobs and stop One Touch Make Ready.

NY State Senate voted 60-1 on bill S.8919.

NY Assembly voted unanimously on bill A.10216A.

The bill now goes to the Governor's desk to be signed into law!
